Summary

Hello, I'm Yash, a passionate Designer focused on enabling innovation through digital. I have a strong understanding of how Graphic Design integrates with an overall brand and its marketing efforts. Also a deep passion for user-centered design, dedicated to making the best use of design expertise to craft meaningful experiences and products for humans. Motivated by Design Thinking, and equally fascinated by the power of human connection and it's ability to energies, transform and catalyze change, especially within fields of expertise.

Education

Interaction Design Foundation.org

March'18 - present

SIES College of Arts Science & Commerce

BSc (Information Technology)

June'15 - May'18

Experience

UI/UX Designer
Bombay Blokes

June'18 - present

Being in the small design & marketing firm I wore all different hats and coordinated with developers and clients to make the optimum product as per the market requirement because of which I acquired perception of various industry that includes Legal, Gems & Jewellery, Sports management.

Community Head
Blockchain India

March'18 - present

My main role is to plan and organize seminar/workshops for the community members and encouraging students community to learn more about blockchain technology and its various application.

Visiting Faculty
SIES College of Arts Science & Commerce

June'17 - present

I deliver lecture series on 'Scratch Programming' to 1st year students of BSc-IT. Using Scratch I help them make 2D games for their semester project.

Self Project
Coded UI

Aug'17 - March'18

Coded UI is a CSS library built to make responsive website quickly. From design to development, I have single handedly deployed the project.

Designer
Freelance

May'17 - June'18

I helped various small businesses with wireframe, prototype, graphics design, logo & identity design deliverables.

Research Paper

Analysis of Cryptocurrency & it's relevance in the Indian Scenario.
